Dear Investor,

### Updates to your investment

Thank you for your continued investment and support of the Antares High Growth Shares Fund (Fund) – Professional Selection class.

Following a comprehensive review of our suite of products, we'll be implementing the following change to the Fund from 1 January 2019:

	<b>Current</b>	<b>From 1 January 2019</b>
Investment return objective	To outperform the S&P/ASX 200 Accumulation Index (Benchmark) by 5% p.a. (before fees) over a rolling five-year period.	To outperform the S&P/ASX 200 Accumulation Index (after fees) over rolling five-year periods.

### Basis for these changes

We want to make sure that we offer investment solutions that are relevant today and reflect the expectations of investors, financial advisers and the broader investment industry. Accordingly, we will be making the following change:

- **Change to the investment return objective description**

There's no change to the way we're managing the Fund. This is simply a change to how we track Fund performance. We're updating the investment return objective from 'before fees' to 'after fees' to better reflect the returns investors receive. We believe this is a more appropriate and contemporary way to assess the returns generated for investors.

The specific outperformance target of 5% p.a. (which was set in December 1999) is also being removed from the investment return objective. This will align the Fund to generally accepted industry practice. We believe this change better reflects the return potential of the Fund.

### Do I need to do anything?

You don't need to take any action as a result of this change. The change in investment return objective will be effective 1 January 2019.
