This Information Memorandum (IM) summarises significant information about the Antares Cash Fund and the Antares Inflation Linked Bond Fund (Funds). Units in the Funds are only offered to residents in Australia who are wholesale clients as defined in section 761G of the Corporations Act 2001(Cth).

This IM contains important information you should consider before making an investment decision in relation to the Funds. The information provided in this IM is general information only and does not take into account your personal financial situation, needs or objectives. The content in this IM may change from time to time without notice. Any changes will be published at antarescapital.com.au. We recommend you obtain financial advice for your own personal circumstances before making an investment decision.

Antares Capital Partners Ltd ABN 85 066 081 114 AFSL 234483, the responsible entity of the Funds (Responsible Entity), is a subsidiary of National Australia Bank Limited Group of companies (NAB Group). No company in the NAB Group guarantees the capital value, payment of income or performance of the Funds. An investment in the Funds does not represent a deposit with or liability of the NAB Group and is subject to investment risk, including possible delays in repayment and loss of income and principal invested. The Antares Cash Fund is no longer a complying investment under the rules applicable to significant investor visa holders in the Migration Act 1958 (Cth) and the Migration Regulations 1994 (Cth).

About the Funds

This IM relates to the following funds (generally referred to as the 'Funds' in this IM):

- Antares Cash Fund
- Antares Inflation Linked Bond Fund

Responsible entity

Antares Capital Partners Ltd (ACP) is the Responsible Entity of the Funds and the issuer of this IM and any units offered under it.

As the Responsible Entity, ACP is responsible for all aspects of operating the Funds including administration of the assets and overall investment policy.

ACP is a member of the NAB Group.

ACP may be referred to as 'us', 'we' or 'our' throughout this IM.

Antares Fixed Income

The Responsible Entity has appointed nabInvest Capital Partners Pty Limited (NCP), a fully owned subsidiary within the NAB Group, as investment manager of the Funds. NCP has a dedicated fixed income asset management business, trading as Antares Fixed Income (Antares).

Antares specialises in managing fixed income and cash portfolios across domestic and international markets. Antares' experienced investment team have managed cash and fixed income portfolios for clients since 1990.

Antares focuses on delivering performance for clients through an investment approach underpinned by dedication, experience and discipline. Antares recognises and is prepared for market uncertainty and believes great performance is achieved through a focus on both risk and return.

For more information on Antares and the Funds, including the investment team's credentials and funds under management, refer to antarescapital.com.au

Antares' investment approach

Antares' risk controlled approach aims to deliver competitive returns through market cycles.

Antares recognises that risks in debt markets are asymmetric, where the risk of capital loss can outweigh the certainty of income receipts. Therefore its portfolios are constructed to capture income and minimise the risk of capital loss.

At the core of Antares' approach to investing are a number of key beliefs, including:

- market, credit and liquidity risks can be quantified and analysed to produce attractive risk and return outcomes
- debt markets are not always efficient and therefore opportunities can be identified and exploited using an active management approach
- by applying diversified strategies across a broad set of opportunities, competitive returns for a given level of risk can be delivered
- a systematic investment approach to modelling strategies, monitoring inputs and implementation can deliver competitive risk and return outcomes, and
- the best results for clients come from a stable, collaborative and highly experienced team of skilled investment professionals.

Antares translates these key beliefs into strategies and portfolios for clients through:

- **Research and security selection**

Antares values securities using fundamental, technical and quantitative tools. This includes research and analysis of macroeconomic, market and company specific factors that influence the pricing of securities. Antares' research focuses on understanding economic environments and the implications for growth, inflation and interest rate settings for Australia and the major global economies.

- **A diversified range of strategies**

Insights from research are applied to a range of strategies which aim to generate excess returns for client portfolios. These strategies have been successfully applied by Antares for more than 25 years and comprise:

- duration
- yield curve
- sector rotation, and
- credit selection

- **Risk management**

A focus on risk management and controls aims to mitigate adverse outcomes.

This is achieved through:

- controlling general portfolio risks – such as excessive volatility and concentration as well as insufficient liquidity
- managing the dominant portfolio risk of capital loss by having a well-diversified portfolio and a rigorous ongoing assessment of economic, market and security specific developments, and
- strong operational systems and controls.

Profile of the Antares Cash Fund

Objective	The aim of the Fund is to actively manage a liquid portfolio of Australian money market and short maturity fixed income securities to generate a regular income stream and preserve capital.
Expected return attributes	Aims to outperform (before fees) the Bloomberg AusBond Bank Bill Index (the Benchmark) over rolling 1 year period.
Investment approach	<p>Antares employs an active investment management approach using a range of strategies with a focus on maintaining a high degree of liquidity. All aspects of Antares' investment approach, outlined on page 2, are applied to managing the Fund. The most important aspects of this approach for the Fund are:</p> <p>Liquidity management</p> <p>Antares ensures the Fund always meets its daily liquidity requirements.</p> <p>Active strategies to enhance returns</p> <p>To enhance returns and control risk Antares makes investment decisions using the following two key strategies:</p> <ul style="list-style-type: none"> • Yield Curve Positioning: The dynamic nature of money markets means the yield curve is constantly changing and requires active monitoring. Antares has proprietary analytical tools that identify value points on the yield curve. Based on this analysis, the portfolio is opportunistically positioned along the yield curve. • Duration Positioning: The Fund's duration exposure is driven mainly by Antares' top down views on the direction of interest rates and from taking advantage of opportunities that arise. These opportunities are derived from Antares' scenario analysis and technical tools that identify directional strategies, particularly in volatile conditions.
Investment strategy	<ul style="list-style-type: none"> • To ensure the Fund can always meet its daily liquidity requirements, the Fund will have investments in highly rated securities that can be easily liquidated on a same day basis. • Invests primarily in cash and deposits issued by banks and authorised deposit-taking institutions (ADI's). • Uses a combination of diversified investment strategies to generate excess returns and manage risk for the Fund. These strategies include liquidity management, yield curve positioning and duration positioning (outlined above). • Derivatives, such as bank bill futures, may be used to improve returns, to reduce risk and to reduce transaction costs. Only covered derivatives may be used. • The Fund will not use leverage or short selling strategies. • May use other strategies, as determined appropriate, with regard to achieving the Fund's objective. <p>To implement the investment strategy above, the Fund can invest in securities directly, or through funds managed by Antares consistent with the investment objective and approach.</p>
Income distribution	The income of the Fund will generally be calculated effective the last day of September, December, March and June and generally be distributed within 7 Business Days. However, there may be periods in which no distributions are made or the Fund may make additional distributions.
Fees and costs	<p>The Management Costs are 0.18% pa of the Fund's net asset value.</p> <p>The above percentage includes GST net of Reduced Input Tax Credits (where applicable).</p> <p>There is currently no buy/sell spread applied to the Fund.</p> <p>For more information on the fees and other costs refer to page 5.</p>
ARSN	168 028 831

Profile of the Antares Inflation Linked Bond Fund

Objective	The aim of the Fund is to provide investors with a level of long-term protection from inflation by actively managing a portfolio of Australian government and semi-government inflation-linked bond and nominal bonds.
Expected return attributes	Aims to outperform (before fees) the Bloomberg AusBond Inflation Government 0-10 Yr Index (the Benchmark) over an interest rate cycle.
Investment approach	<p>Inflation linked bonds (ILBs) are bonds in which the principal or coupon interest is indexed to inflation. They provide a hedge against inflation by maintaining the real purchasing power of the principal investment.</p> <p>Antares views ILBs as a separate sector within the Australian fixed income market and applies specialist skills to manage them. This is important because the main driver of returns for ILBs is inflation and inflationary expectations which have a longer-term perspective than changes in interest rates.</p> <p>Antares employs an active investment management approach using a range of strategies with a focus on hedging inflation risks over the medium to long term. All aspects of Antares' investment approach, outlined on page 2 are applied to managing the Fund. This approach is based on a rigorous assessment of the drivers of ILBs and nominal bonds and their relationship to each other through the economic and interest rate cycle.</p> <p>In addition, technical analysis is used to:</p> <ul style="list-style-type: none"> • capture short-term trading opportunities • define entry and exit levels, and • determine credit spread relationships. <p>Antares adopts longer-term views on valuation, as well as managing shorter-term tactical trading opportunities. The latter may include trading relative value, spread relationships or exploiting outright trading opportunities influenced by supply and demand dynamics and economic drivers.</p> <p>In constructing the portfolio, Antares aims to capture the market return of ILBs in an efficient manner, while maximising returns in a risk controlled way.</p>
Investment strategy	<ul style="list-style-type: none"> • Invests primarily in Australian government and semi-government inflation-linked bonds. • Has the capacity to strategically deviate from the Benchmark while always maintaining an exposure to inflation linked bonds. • Uses a combination of diversified investment strategies to generate excess returns and manage risk for the Fund. These strategies include term extension, yield curve positioning, duration, relative value positioning and various other tactical strategies. • Extracts returns from the inter-play between nominal and real interest rates. • The Fund has the ability to use derivatives. These derivatives are used from time to time to assist in managing the Fund's interest rate risk, credit risk, and inflation risk. These derivatives are entered into with highly credit rated counterparties and exposures are backed by cash or high quality government bonds. Only covered derivatives may be used. • The Fund will not use leverage or short selling strategies. • May use other strategies, as determined appropriate, with regard to achieving the Fund's objective.
Income distribution	The income of the Fund will generally be calculated effective the last day of September, December, March and June and generally be distributed within 7 Business Days. However, there may be periods in which no distributions are made or the Fund may make additional distributions.
Fees and costs	<p>The Management Costs are 0.30% pa of the Fund's net asset value.</p> <p>The above percentage includes GST net of Reduced Input Tax Credits (where applicable).</p> <p>There is currently no buy/sell spread applied to the Fund.</p> <p>For more information on the fees and other costs refer to page 5.</p>

Explanation of fees and costs

Management Costs

The Management Costs are made up of fees and costs for investing the Funds' assets and other expenses for operating the Funds. They include fees charged by the Responsible Entity, fees paid to the investment manager and other expenses incurred in operating the Funds, such as custody costs, registry costs, auditing fees and tax return fees.

The Management Costs do not include buy/sell spreads or transaction costs.

The Management Costs are reflected in the daily unit price. They are paid from the assets of the Trust and are not required to be paid by you separately.

You may be able to negotiate the Management Costs by contacting Client Services on **1300 738 355**.

Buy/Sell spreads

You incur the buy/sell spread when you buy or sell units in the Funds.

Currently there is no buy/sell spread applied to the Funds.

Reimbursable expenses

We are entitled to be reimbursed from the Funds for all costs and expenses incurred in acting as Responsible Entity or in relation to the administration and management of the Funds. The expenses may include, but are not limited to, IM preparation and printing costs.

We currently pay these costs and expenses out of the Management Costs and do not charge them to you as an additional cost.

Fees paid to the NAB Group companies

We may use the services of NAB Group companies where it makes good business sense to do so and will benefit our unitholders.

Examples of such services providers include custody and registry operators and investment managers. Amounts paid for these services are always negotiated on an arm's length basis and are included in the fees detailed in the IM.

Changes to fees and costs

We may vary fees or introduce new fees up to the maximums described in the Constitutions, without your consent.

We may decide to recover expenses directly from the Funds rather than pay them out of the Management Costs.

We will give you 30 days' notice of any increase in fees. No prior notice will be given in respect of changes to the buy/sell spreads.

Some things to consider before you invest

While Antares rigorously applies its disciplined investment approach, it's important for you to carefully consider the risks of investing in the Funds and to understand that:

- its value, and returns, will vary over time
- investments with higher long-term return potential usually have higher levels of short-term risk
- returns aren't guaranteed, and you may lose some of your money
- future returns may differ from past returns
- laws affecting your managed investment may change in future, and
- the Fund may enter into transactions with and hold investments with related parties from time to time. All transactions between the Fund and related parties are conducted on an arm's length basis.

Some factors to bear in mind

The risks of investing in the Funds are typical of the risks of managed investment schemes investing in cash and inflation-linked bonds.

These risks include:

- **Market risk:** risks that affect entire fixed income markets including investor sentiment, economic impacts, inflation rates, regulatory conditions, interest rates, political and catastrophic events. Market risk varies between countries.
- **Credit (default) risk:** when investing in fixed income you're effectively lending money to businesses or governments. Market values of fixed income securities may rise or fall due to changes in perceptions of an issuer being able to meet their obligations, including interest and capital repayments. The risk of an issuer defaulting on their payments increases with declining quality of credit issuers, e.g. credit risk is higher for high yield securities than investment grade securities.
- **Interest rate risk:** the value of the Fund's investments may be sensitive to changes in interest rates. Fixed income securities' values tend to move in opposite directions to interest rates. So when interest rates rise fixed income securities' values tend to fall. Short-term fixed income securities are generally less sensitive to interest rate changes than longer-term securities.
- **Derivative risk:** Derivatives are contracts that have a value derived from another source such as an asset, market index or interest rate. There are many types of derivatives including swaps, options and futures. They are a common tool used to manage risk or improve returns. Some derivatives allow investment managers to earn large returns from small movements in the underlying asset's price. However, they can lose large amounts if the price movement in the underlying asset is unfavourable. Risks particular to derivatives include the risk that the value of a derivative may not move in line with

the underlying asset, the counterparties to the derivative may not be able to meet payment obligations and the risk that a particular derivative may be difficult or costly to trade.

- **Fund risk:** risks specific to the Funds include the risk that the Funds could terminate and that the fees and costs could change. There is also a risk that investing in the Funds may give different results than investing directly because of the impact of fees, income or capital gains accrued in the Funds and the consequences of investments and withdrawals by other investors.
- **Investment manager performance risk:** investment managers have different approaches to managing portfolios, which invariably results in different investment returns. No single investment approach is guaranteed to outperform all others in all market conditions. Changes to investment markets and within an investment manager's firm may also affect an investment manager's performance.
- **Liquidity risk:** this is the risk that an investment may not be able to be sold without incurring large transaction costs or quickly enough to avoid a reduction in the value of your investment. A lack of liquidity may also affect the amount of time it takes us to satisfy withdrawal requests.

Some important details

About the Funds

Each Fund is governed by its Constitution and is registered with the Australian Securities and Investments Commission (ASIC). The Funds may make investments directly or indirectly by investing in other funds that have investment objectives and authorised investments that are consistent with the Funds.

Opening an account

To invest in the Funds you must be a resident in Australia and be a wholesale client within the meaning of the Corporations Act 2001.

This IM only constitutes an offer if you receive it in Australia.

However we reserve the right to make an offer of units to any institutional investor outside Australia where to do so would not be in breach of the securities law requirements of that jurisdiction.

You should contact us to discuss the application requirements before lodging your application form and we will advise, where possible, what you need to do. Until all requirements are satisfied, we cannot accept an application.

If at any time after investing in the Funds you no longer satisfy the relevant eligibility criteria, you must advise us and it may require the redemption of your unitholding.

As at the date of the IM, the Funds are not offered or sold to US residents.

Minimum balance

You need to maintain a minimum balance of \$5,000,000 per Fund you are investing in. However, we may accept lower amounts at our discretion. We may redeem your unit holding if your account balance falls below \$5,000,000.

Units and unit prices

When money is paid into a Fund, units are issued and when money is paid out, units are cancelled.

The overall value of your investment in a Fund will change according to the unit price and the number of units held.

We usually calculate the unit price as at the end of each Business Day and use robust unit pricing policies to do this.

The unit price will reflect the performance of the underlying assets, income earned, fees, expenses and taxes paid and payable.

The performance of the underlying assets is influenced by movements in investment markets.

If you would like to find out more about our unit pricing philosophy, and how we will exercise any discretions in relation to unit pricing, you can obtain a copy of our Unit Pricing Policy by calling Client Services on **1300 738 355**.

If there is a unit pricing error that substantially impacts a Fund's performance, an adjustment may be made. This will generally involve reprocessing affected transactions using the corrected unit price, adjusting your account or both. The value of your investment could be increased or decreased as a result.

Adding to your account

Once you've opened your account, you can make additional investments by electronic funds transfer (EFT).

Application requests accepted by the Funds before 3:00pm (Sydney time) on any Business Day will receive that day's unit price. Application requests accepted after 3:00pm will receive the next Business Day's unit price.

We have the discretion to accept or refuse any initial or subsequent application without explanation.

Accessing your money

You can request a partial or a full withdrawal from your account to a nominated bank account at any time.

Once accepted, withdrawal requests received by the Funds before 3:00pm (Sydney time) on any Business Day will normally receive that day's unit price. Requests received after 3:00pm will normally receive the next Business Day's unit price.

Withdrawal requests will be actioned by us promptly and the Funds generally seek to make payments within 10 Business Days.

However, payment may be delayed, for example if underlying assets need to be sold. In certain circumstances, such as when there are adverse market conditions, we may also delay withdrawals.

We may also process requests in instalments over a period of time and may also delay payment of withdrawal requests we have already accepted. In certain circumstances we may refuse a withdrawal request.

In circumstances where withdrawals are delayed, suspended or being paid in instalments, the unit prices used for a withdrawal may be those applicable to the day the withdrawal is effected, rather than the time the withdrawal request is received.

Once lodged, withdrawal requests may not be withdrawn except with our consent.

Business Days are generally days on which banks are open for business in Sydney (except Saturday, Sunday and public or bank holidays or such other days as we determine from time to time).

We have the discretion to declare any day to be a Business Day.

Some important details (continued)

Transfers

You may be able to transfer all or some of your unit holding to another eligible investor. Please contact Client Services on **1300 738 355** for more information.

Transacting on your account

We can only process transaction requests when we receive all required information. We will not be responsible for any loss arising from unauthorised or fraudulent requests.

Application monies will be held in trust in a non-interest bearing account until processed. If we are unable to process your application within 30 days of receipt we will return your money to you.

We may deduct amounts or redeem units in certain circumstances

We may deduct from a withdrawal payment any amount owed under the Constitution, including taxes. We may also redeem some or all of a unitholding in a Fund to satisfy any such amounts.

We may also redeem all or some of a unit holding if we form the opinion that the unit holding is prejudicial to the interests of other investors.

Income distributions

Our current practice is to generally distribute all of the net taxable income of the Funds to investors for each financial year (including any net capital gains and net gains on currency management). As the Funds are Attribution Managed Investment Trusts (AMITs), we have the discretion to accumulate income (instead of distributing all of the income) and if we do so, the accumulated income will be reflected in the unit price. We intend to continue our current practice to distribute all of the income (including any capital gains) for each year. We will notify you if this changes.

To receive a distribution, you must hold units on the distribution calculation date.

We generally aim to pay distributions within 7 Business Days of the calculation date.

You can request to have income distributions:

- reinvested in the Funds, or
- paid into your bank account.

We may, in our absolute discretion, accept or reject any such request. If you do not make an election we will reinvest the income back into the Funds.

On the reinvestment of income, units will be issued at the unit price applicable at the distribution calculation date. No buy spread is currently applied to the issue of these units.

Some of the Funds' investments may also generate capital gains or losses which may result in net capital gains being distributed from time to time.

Changes to the Funds

We may make changes to the Funds (and the information in this IM) at our discretion, including but not limited to, terminating the Funds or changing the investment manager when we deem it to be in unitholders' best interests. Some changes may be made without prior notice, including but not limited to, closing the Funds to new applications and changes to the investment strategy, asset allocation and service providers.

Where possible, we will give you prior written notice of any materially adverse change.

Changes that are not materially adverse may be made available on the website antarescapital.com.au/acf for Antares Cash Fund, and antarescapital.com.au/ailbf for Antares Inflation Linked Bond Fund. You should check the website for the latest information or you can obtain a copy of any updated information free of charge by calling Client Services on **1300 738 355**.

Unitholders' liability

A Fund's underlying assets are owned by the Responsible Entity on behalf of investors. The Funds' Constitutions limit unitholders' liability to their investment in the relevant Fund.

Termination of the Funds

A Fund may be terminated:

- if ACP believes the Fund can no longer fulfil its purpose
- if the Fund's unitholders pass an extraordinary resolution to terminate the Fund
- by Court order; or
- as otherwise allowed by the Constitution or law.

Tax

Because tax laws are complex and change from time to time, you should seek professional tax advice on your investment in the Funds.

The Funds themselves generally should not be liable for tax on their net earnings. Rather investors should include their proportion of this income in their tax returns. Any net losses are retained by the Funds and used to offset future matching gains.

If you buy units before a distribution, the unit price will include income accumulated in the Funds. The income that has been accumulating will generally be distributed and you may potentially have taxation liabilities on that income.

Depending on an investor's circumstances, a revenue or capital gain or loss may arise when units in the Funds are sold, switched or redeemed.

Some important details (continued)

Overview of the AMIT regime

A specific regime for the taxation of managed investment schemes (AMIT regime) was introduced on 5 May 2016. The AMIT regime is designed to provide greater flexibility for managed funds and fairness for their investors. We have elected for the AMIT regime to apply to the Funds for the 2017/18 financial year and onwards.

Under the AMIT regime, investors are taxed on income that is attributed to them on a "fair and reasonable basis" for each financial year.

Under the AMIT regime it's not necessary for a Fund to distribute all its income (including capital gains) in order to ensure that the Fund doesn't pay tax. Instead, we have the discretion to accumulate income in the Fund and it would be reflected in the unit price. Taxable income is attributed to investors, even if a Fund doesn't distribute its income.

However, we intend to continue our current practice of distributing all of a Fund's income (including any capital gains) to our investors each financial year. We will notify you if this changes.

The details of the taxable income attributed to you will be set out in an AMIT Member Annual Statement (AMMA Statement), which will contain all necessary tax information. The tax payable (if any) depends on your individual tax profile and applicable tax rate.

If you disagree with our attribution of taxable income, you can object to the Commissioner of Taxation. If you decide to take this course, it is important that you obtain professional tax and legal advice. The Constitution of each Fund provides for you to give us notice before making an objection, so please do so and we will work with you to try to resolve the issue.

This IM is not a tax guide.

We recommend that you contact your tax adviser or the Australian Tax Office at ato.gov.au for further details and expert advice in relation to your own personal circumstances.

This applies whether you are an Australian resident or a non-resident for tax purposes.

Privacy

We collect and hold information necessary to provide you with the relevant services and information related to your investment. If you do not provide your personal information we may not be able to provide you with these services. We are subject to the NAB Group's Privacy Policy which is available by contacting Client Services or visiting our website at antarescapital.com.au. We may disclose your personal information within the NAB Group and to others. More information about how we collect, use, share and handle your personal information is in our Privacy Policy,

including how you may access or correct your information, the countries we may send your information to and how you may make a complaint about a privacy issue.

Identity verification documents

Under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (AML CTF Act), we are required to collect original certified copies of original document(s) (not faxed or scanned copies) to verify your identity and that of related parties (including if you are a non-individual entity, identity of any persons who are deemed to own or control (directly or indirectly) you ("beneficial owner")).

In addition, under the AML/CTF Act, we may be required to ask you for additional identity verification documents or information about you, a related party or a beneficial owner either when we are processing your application or at some stage after we issue the units.

Until we receive such document(s) we reserve the right to delay or withhold processing any withdrawal requests you wish to make. We will incur no liability to you or a related party if we do so.

Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standard (CRS)

We are required to collect information about your tax residency status, including whether you are a US citizen or resident for US tax purposes, and other relevant information to determine your reporting status under the FATCA and the CRS rules. If you identify yourself as a foreign resident for tax purposes, your account information may be reported to the relevant tax authorities.

Resolving complaints

We can usually resolve complaints over the phone. If we can't or you're not satisfied with the outcome, then you will need to write to us. We will work to resolve your complaint as soon as possible.

Keeping you informed

You can obtain information on your account and update your details by contacting us.

Some important details (continued)

We provide the following information so you can stay informed about your investments:

Transaction confirmation	Confirms any investment, switch or withdrawal you make on your account.
Quarterly statement	Provides a summary of your transactions and investment details for the quarter. A monthly statement is available upon request.
Distribution statement	Provides details of the distributions paid on your account.
Annual taxation statement (or AMMA Statement, if applicable)	Provides details of the share of the income distributed or attributed to you, as applicable, during the financial year to assist you in completing your tax return.
Annual financial report	You can elect to receive, free of charge, a copy of the relevant Fund's annual report as a hard copy or an electronic copy. If you do not make an election, you can access a copy of the relevant Fund's annual report on our website antarescapital.com.au
Constitution	
Performance history	
Unit Pricing Policy	This information is available to you on request.
Derivatives Policy	
Privacy Policy	
IM updates	You can obtain the latest copy of the IM on request by contacting Client Services on 1300 738 355 or visiting the website antarescapital.com.au . The IM can be updated or replaced from time to time.
