1. About Antares Capital Partners Ltd

Responsible Entity

Antares Capital Partners Ltd (ACP) is the Responsible Entity of the Fund and the issuer of this PDS and any units offered under it.

As the Responsible Entity, ACP is responsible for all aspects of operating the Fund including administration of the assets and overall investment policy.

ACP is a member of the NAB Group. ACP may also be referred to as 'us', 'we' or 'our' throughout this PDS.

Antares

The Responsible Entity has appointed MLC Asset Management Pty Ltd, a fully owned subsidiary within the NAB Group, trading as Antares Fixed Income (Antares), a specialist fixed income and cash manager, as investment manager of the Fund.

Within the NAB Group, Antares refers to the dedicated asset management business combining NAB Group's direct equities and fixed income capabilities.

Antares has managed fixed income and cash portfolios for investors since 1990 and has a collaborative and highly experienced investment team.

Antares recognises and is prepared for market uncertainty and therefore focuses on delivering performance for investors within a carefully risk controlled framework.

For more information on Antares visit antarescapital.com.au

Important information

This Product Disclosure Statement (PDS) summarises significant information about the Antares Diversified Fixed Income Fund (Fund).

It also contains a number of references to important information in the Antares Diversified Fixed Income Fund Product Guide (Product Guide) marked with an **I** symbol. The Product Guide is a separate document which forms part of this PDS. This PDS and the Product Guide contain important information you should consider before making an investment decision in relation to the Fund. The information provided in this PDS is general information only and does not take into account your personal financial situation or needs. We recommend you obtain financial advice for your own personal circumstances before making any investment decision.

These documents are available from mlcam.com.au/adfif or you can request a copy free of charge by calling us on **1300 738 355** or by contacting your investor directed portfolio service, IDPS-like scheme, master trust or wrap operator (collectively referred to as an 'IDPS' in this PDS). To invest directly in the Fund you must have received the PDS (electronically or otherwise) within Australia. The information in these documents is up to date at the time of preparation and may change from time to time. If a change is considered materially adverse, we will issue a replacement PDS. Information that is not materially adverse to investors can be updated by us and will be published on our website mlcam.com.au/adfif. A paper copy of any updates will be provided free of charge upon request. You should check you have the most up to date version before making an investment decision. All amounts in these documents are in Australian dollars unless stated otherwise.

Antares Capital Partners Ltd, the responsible entity of the Fund (Responsible Entity), is a fully owned subsidiary within the National Australia Bank Limited Group of companies (NAB Group). No company in the NAB Group guarantees the capital value, payment of income or performance of the Fund. An investment in the Fund does not represent a deposit with or liability of the NAB Group and is subject to investment risk, including possible delays in repayment and loss of income and principal invested.

MLC Asset Management Pty Ltd has given its written consent to being named and quoted in this PDS, and to the inclusion of statements made by it or said to be based on statements made by it. As at the date of this PDS these consents have not been withdrawn.

Bloomberg Finance L.P. and its affiliates (collectively, "Bloomberg") do not approve or endorse any information included in this material and disclaim all liability for any loss or damage of any kind arising out of the use of all or any part of this material.

2. How the Antares Diversified Fixed Income Fund works

About the Fund

The Fund may suit investors looking to diversify a portfolio that is already weighted to growth-focused assets, such as shares and property. The Fund predominantly invests in a combination of:

- highly-rated longer-maturity bonds, including bonds issued by governments, to provide diversification of returns from growth assets, and
- shorter-maturity corporate bonds that Antares believes will enhance the Fund's returns while managing risk.

Antares actively manages each of these allocations based on economic and market conditions.

The Fund operates like most other managed investment schemes. Your money is pooled together with other investors' money to buy investments which are managed on behalf of all investors.

When you invest in a managed investment scheme, such as the Fund, you gain exposure to investments that you may not ordinarily have access to, if you invest on your own.

The Fund is governed by its constitution (Constitution) and is registered with the Australian Securities and Investments Commission (ASIC). ASIC takes no responsibility for this PDS or the operation of the Fund by ACP.

Units and unit prices

The Fund is a 'unit trust'. When you invest in the Fund you acquire an 'interest' in the form of units in the Fund, rather than ownership of the underlying assets of the Fund. When your money is paid into the Fund, units are issued to you and when money is paid out, your units are cancelled.

The value of your investment is reflected in the price of the units. The unit price changes every business day, reflecting the performance (rises and falls in value) of the underlying assets due to market movements, as well as income earned, fees, expenses and taxes paid and payable.

We usually calculate the unit price for the Fund as at the end of each business day.

All references to 'business day' in this PDS and the Product Guide mean days other than a Saturday or a Sunday, or a public or bank holiday in Sydney.

We have the discretion to declare any day to be a business day.

Investing directly

To invest in the Fund you will need to complete an Initial Application Form. The Initial Application Form is available at mlcam.com.au or on request from Client Services on **1300 738 355**. Please see section 8 'How to apply' for more information.

Once you've opened your account, you can make additional investments by sending us an Additional Investment Form with a direct deposit or cheque.

The following minimum investment amounts and balance apply:

- minimum initial investment and minimum balance: \$20,000, and
- minimum additional investment: \$1,000.

If accepted, application requests received by the Fund before 3:00 pm (Sydney time) on any business day will normally receive that day's unit price. Application requests received after 3:00 pm will normally receive the next business day's unit price.

If you invest directly into the Fund then you hold units in the Fund and have the rights of a unitholder, as set out in the Constitution. This applies whether your investment is made using the Initial Application Form, or the Additional Investment Form.

Accessing your money

You can request a partial or a full withdrawal at any time by either mailing or faxing to Registry Services a completed Withdrawal Form or providing written notice. The Withdrawal Form is available at mlcam.com.au or on request from Client Services on **1300 738 355**.

Once lodged, withdrawal requests may not be cancelled except with our consent. If a withdrawal request results in you holding less than the minimum balance in the Fund, we may treat your withdrawal request as being for the whole of your investment in the Fund.

If accepted, withdrawal requests received by the Fund before 3:00 pm (Sydney time) on any business day will normally receive that day's unit price. Requests received after 3:00 pm will normally receive the next business day's unit price.

Withdrawal payments will generally be made to your nominated Australian bank account within 10 business days.

In certain circumstances, withdrawals may be delayed. These circumstances may include where a large number of assets need to be sold, where we believe that it is not in the best interests of unitholders to sell underlying assets or where we are unable to calculate the withdrawal price or realise sufficient assets due to circumstances outside our control, such as restricted or suspended trading in the market for an asset.

We may also process requests in instalments over a period of time.

In circumstances where withdrawals are delayed or being paid in instalments, the unit prices used for a withdrawal may be those

available on the day the withdrawal takes effect, rather than the day the withdrawal request is received.

In the unlikely event that the Fund becomes illiquid (as defined in the *Corporations Act 2001 (Cth)*), you may only withdraw your funds in accordance with any withdrawal offer that we make.

Income distributions

The income of the Fund will generally be calculated effective the last day of September, December, March and June each year. To receive a distribution, you must hold units on the distribution calculation date.

Distributions are generally calculated based on the Fund's net income at the end of the distribution period divided by the number of units on issue. We generally aim to pay income distributions within 10 business days.

There may be periods in which no distributions are made or the Fund may make additional distributions.

Our current practice is to generally distribute all of the net taxable income of the Fund to investors each financial year (including net capital gains and any net gains on currency management). As the Fund is an Attribution Managed Investment Trust (AMIT), we have the discretion to accumulate income (instead of distributing all of the income) and if we do so, the accumulated income will be reflected in the unit price. We intend to continue our current practice to distribute all of the income (including any capital gains) for each year. We will notify you if this changes.

You can request to have income distributions:

- reinvested into the Fund, or
- paid into your nominated Australian bank account.

If you do not make a selection we will reinvest the distribution into the Fund.

You can change your distribution selection at any time by either mailing or faxing a completed Change of Details Form to Registry Services at least five business days prior to the end of a distribution period. The Change of Details Form is available at mlcam.com.au or on request from Client Services on **1300 738 355**.

Investing via an IDPS

If you invest in the Fund through an IDPS, then you do not hold units in the Fund and you have none of the rights of a unitholder.

Instead the IDPS holds units on your behalf, acquires unitholder rights and may exercise these rights as it sees fit without reference to you.

We authorise the use of this PDS as disclosure to persons who wish to access the Fund through an IDPS. This PDS must be read together with offer documents provided by the IDPS operator and you can apply to invest or perform other transactions by completing the relevant forms provided by the IDPS operator.

Investing through an IDPS may result in different conditions applying from those referred to in this PDS including:

- minimum balance requirements
- fees and other costs
- cooling-off rights
- how to transact on your investment
- timing of processing of transactions and payment of distributions and withdrawals, and
- provision of statements and other information.

You should contact your financial adviser or IDPS operator for further information.

! You should read the important information about **How the Fund works** before making a decision. Go to the Product Guide available at mlcam.com.au/adfif_pg. The material relating to **How the Fund works** may change between the time when you read this statement and the day when you acquire the product.

3. Benefits of investing in the Antares Diversified Fixed Income Fund

Diversification for growth-focused portfolios

Diversifying a portfolio can be a good way to spread risk across a number of different investments. As the Fund invests in a broad range of fixed income securities it can help diversify a portfolio that is weighted to growth-focused assets such as shares or property.

While investors in growth-focused portfolios generally accept they'll experience negative returns at times, these returns tend to be particularly weak when economic growth is slowing such as in a 'credit crunch', when banks sharply reduce lending or in an economic recession. In these environments, central banks usually try to stimulate growth by lowering interest rates. The Fund's investments in longer-maturity government bonds with fixed interest rates tend to produce the greatest increase in value at these times, providing compelling return diversification to investors' growth assets.

On the other hand, in a strong economic growth environment, or an inflationary period, where interest rates are rising, the value of these long-maturity bonds may fall.

The long-maturity bonds Antares selects are usually issued by governments, government agencies and other issuers with high credit ratings.

Income-generating investment

Antares also invests the Fund in bonds issued by corporates that pay a higher yield than government bonds. Corporate bonds pay higher yields to compensate investors for their higher risks including credit, default and liquidity risk. The difference between the higher yield on these bonds and government bond yields is known as the 'credit spread'. Antares has expertise in identifying corporate bonds which pay appropriate yields to compensate investors for the risk taken. It's Antares' prudent management of credit risk that's expected to help the Fund generate attractive income for investors (after deducting fees).

The majority of corporate bonds Antares selects for the Fund are rated as 'investment grade'. Antares usually invests in corporate bonds with shorter-terms to maturity to reduce the risks of rising interest rates and widening credit spreads.

Aims for better returns than the market

Antares looks for ways to improve returns and reduce risk based on their assessment of economic and market conditions. By applying an active investment approach, Antares aims to achieve returns that are above the Bloomberg AusBond Australian All Maturities Composite Bond Index (Benchmark), after deducting fees, over rolling three year periods.

Multiple sources of returns

The Fund provides access to a broader range of fixed income securities than would usually be available to individual investors. The Fund invests predominantly in securities issued in Australian dollars and has flexibility to invest up to 50% in foreign currency denominated securities. Foreign currency exposures will be substantially hedged to the Australian dollar.

Antares uses multiple interest rate and credit strategies to generate returns with a clear focus on reducing the risk of negative returns.

Antares' investment expertise

Antares' experienced fixed income team have managed cash and fixed income funds since 1990. Antares manages over \$28.5 billion (at 30 June 2019) across a range of cash and fixed income strategies.

Antares' investment approach has been effective in many challenging investment conditions. This process is explained in section 5, 'How we invest your money'.

Meeting liquidity needs

Antares seeks to meet investors' needs to make withdrawals by investing primarily in securities that can be bought and sold on a daily basis, in a normal market environment.

4. Risks of managed investment schemes

Investment risk

All investments come with some risk. Some investments will have more risk than others as it depends on the investment's strategy and assets.

The value of an investment with a higher level of risk will tend to rise and fall more often and by greater amounts than investments with lower levels of risk, ie it's more volatile.

While it may seem confronting, investment risk is a normal part of investing. Without it you may not get the returns you need to reach your investment goals. This is known as the risk/return trade-off.

The level of risk you're prepared to accept will be determined by various factors, including:

- your investment goals
- the savings you'll need to reach these goals
- your age and the time you have to invest
- where your other assets are invested
- the return you may expect from your investments, and
- how comfortable you are with investment risk.

While Antares rigorously applies a disciplined investment approach, it's important for you to carefully consider the risks of investing in the Fund and to understand that:

- its value and returns will vary over time
- investments with higher long-term return potential usually have higher levels of short-term risk
- returns aren't guaranteed and you may lose money
- future returns will differ from past returns, and
- laws affecting your investment may change in future.

Significant risks

Many factors influence an investment's value. The significant risks of investing in the Fund are typical of the risks of managed investment schemes whose investment strategy is to invest in a diversified portfolio of fixed income securities.

These risks include:

- **Market risk:** risks that affect entire fixed income markets including investor sentiment, economic impacts, inflation rates, regulatory conditions, interest rates, and political and catastrophic events. Market risk varies between countries.
- **Credit (default) risk:** when investing in fixed income you're effectively lending money to businesses or governments. Market values of fixed income securities may rise or fall due to changes in perceptions of an issuer being able to meet their obligations, including interest and capital repayments. The risk of an issuer defaulting on their payments increases with declining quality

of credit issuers eg credit risk is higher for high yield securities than investment grade securities.

- **Interest rate risk:** the value of the Fund's investments may be sensitive to changes to interest rates. Fixed income securities' values tend to move in opposite directions to interest rates. So when interest rates rise fixed income securities' values tend to fall. Short-term fixed income securities are generally less sensitive to interest rate changes than longer-term securities.
- **Currency risk:** the value of fixed income securities issued in foreign currencies will change if the exchange rate between the Australian dollar and the foreign currency moves. However, where the Fund hedges foreign currency exposures to the Australian dollar, Australian investors are largely protected against movements in exchange rates. This is known as currency hedging. Currency hedging involves costs and implementation risks due to the volatility of currency and securities markets. Additionally, the Fund's income distributions may be affected. For example gains from currency hedging may result in the Fund distributing significant additional income to investors.

- **Derivatives risk:** derivatives are contracts that have a value derived from another source such as an asset, market index or interest rate. There are many types of derivatives including swaps, options and futures. They are a common tool used to manage risk or improve returns. Some derivatives allow investment managers to earn large returns from small movements in the underlying asset's price. However, they can lose large amounts if the price movement in the underlying asset is unfavourable. Risks particular to derivatives include the risk that the value of a derivative may not move in line with the underlying asset, the risk that counterparties to the derivative may not be able to meet payment obligations and the risk that a particular derivative may be difficult or costly to trade.
- **Liquidity risk:** this is the risk that an investment may not be able to be sold without incurring large transactional costs or quickly enough to prevent or minimise a loss. A lack of liquidity may also affect the amount of time it takes us to satisfy withdrawal requests.

- **Fund risk:** risks specific to the Fund include the risk that the Fund could terminate and that the fees and costs could change. There is also a risk that investing in the Fund may give different results than investing directly because of the impact of fees, income or capital gains accrued in the Fund and the consequences of investments and withdrawals by other investors.
- **Investment manager performance risk:** investment managers have different approaches to managing portfolios, which invariably results in different investment returns. No single investment approach is guaranteed to outperform all others in all market conditions. Changes to investment markets and within an investment manager's firm may also affect an investment manager's performance.

5. How we invest your money

The following table provides an overview of the Fund's investment return objective and investment approach.

You should consider the likely investment return and risk of the Fund and your investment time frame when deciding whether to invest into the Fund.

Antares Diversified Fixed Income Fund	
Fund description	<p>The Fund may suit investors looking to diversify a portfolio that is already weighted to growth-focused assets, such as shares and property. The Fund predominantly invests in a combination of:</p> <ul style="list-style-type: none"> • highly-rated longer-maturity bonds, including bonds issued by governments, to provide diversification of returns from growth assets, and • shorter-maturity corporate bonds that Antares believes will enhance the Fund's returns while managing risk. <p>Antares actively manages each of these allocations based on economic and market conditions.</p>
Investment return objective	Aims to outperform the Bloomberg AusBond Australian All Maturities Composite Bond Index over rolling three year periods, after deducting management fees.
Benchmark	Bloomberg AusBond Australian All Maturities Composite Bond Index
Investment approach	<p>Antares actively manages the Fund using a macro research process to develop a view of the global economy and its likely impact on the Australian economic outlook. This top-down process is combined with Antares' expert analysis of the interest rate yield curve and bottom-up credit research. Combining top-down and bottom-up research gives Antares a deep understanding of how different types of fixed income securities are likely to perform, and the extent of their risks in possible future economic scenarios. Antares uses this analysis to prudently manage risk and identify the most attractive securities that it believes will best achieve the Fund's objective.</p> <p>Antares builds a core allocation to highly-rated longer-maturity bonds and shorter-maturity corporate bonds. Exposures to return enhancing strategies are adjusted as the market outlook or conditions change.</p> <p>Antares actively manages the Fund's average maturity relative to the Benchmark. The Benchmark's average maturity is approximately 5 years at the date of the PDS and is usually in the range of 3 to 7 years.</p>
Indicative asset allocation ranges and investments	<p>Australian dollar securities: 0 - 100%</p> <p>Foreign currency denominated securities: 0 - 50%</p> <p>Foreign currency exposures will be substantially hedged to the Australian dollar.</p> <p>The Fund may invest in a broad range of securities (including derivatives) directly or through funds managed by Antares, including:</p> <ul style="list-style-type: none"> • government and government-related bonds

Antares Diversified Fixed Income Fund	
	<ul style="list-style-type: none"> • corporate bonds • mortgage-backed and asset-backed securities • hybrid and convertible securities • cash and short-term securities, and • interest rate and credit derivatives including swaps, options and futures.
Use of derivatives	Derivatives may be used within the Fund to manage exposure to interest rates and credit markets, to hedge currency exposure (into Australian dollars), to improve returns, to reduce risk and to reduce transactional costs. Derivatives will not be used for gearing purposes.
Minimum suggested timeframe	3 years
Risk level (expected volatility)	Low: The likelihood of the value of your investment going down over the short term is low compared to funds investing in other types of assets such as property securities and shares. The lower level of volatility means the Fund has less potential for higher returns over the long term. See section 4 'Risks of managed investment schemes' for further information.
The Fund may be suited to you if you:	<ul style="list-style-type: none"> • want to invest in an actively managed fixed income portfolio designed to provide diversification of returns for a growth-focused portfolio • want to generate income from your investments and are comfortable the income amount may fluctuate, and • are willing to accept some risk, including credit and interest rate risk, to grow your assets over the long term.
Labour standards, environmental, social and ethical considerations	The Responsible Entity does not itself take into account labour standards and environmental, social and ethical considerations for the purposes of selecting, retaining or realising investments. The Responsible Entity has delegated investment management decisions for the Fund to Antares. Generally, Antares does not take into account labour standards, environmental, social or ethical considerations when making decisions to buy, retain or sell the investments of the Fund. However, if Antares believes those matters may affect the value or performance of an investment, they may be considered. Antares does not have a predetermined view as to what constitutes an unacceptable labour standard or environmental, social or ethical consideration and these will be determined on a case by case basis.

Changes to the Fund

We may make changes to the Fund (and the information in this PDS) at our discretion, including but not limited to, terminating the Fund or changing the investment manager when we deem it to be in unitholders' best interests. Some changes may be made without prior notice, including but not limited to, closing the Fund to new applications and changes to the investment strategy, asset allocation and service providers.

Where possible, we will give you prior written notice of any materially adverse change.

Changes that are not materially adverse may be made available on the website mlcam.com.au/adfif. You should check the website for the latest information or you can obtain a paper copy of any updated information free of charge by calling Client Services on **1300 738 355**.

If you invest via an IDPS and you would like to receive notices of any changes to the Fund or PDS you should request this from your IDPS operator.

6. Fees and costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns. For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask the Fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** website www.moneysmart.gov.au has a managed funds fee calculator to help you check out different fee options.

The ASIC managed funds fee calculator can also be used to calculate the effect of fees and costs on account balances.

The fees and costs outlined in this PDS are for the Fund only.

You should read all of the information about fees and costs because it is important to understand their impact on your investment in the Fund. If you are investing in the Fund via an IDPS, you will need to consider the fees and other costs of the IDPS when calculating the total cost of your investment.

If you consult a financial adviser you may also pay an additional fee that will be set out in the Statement of Advice between you and your financial adviser.

This section shows the fees and other costs that you may be charged in relation to the Fund. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole.

The information in this table can be used to compare fees and costs between different simple managed investment schemes. Taxes are set out under the 'How managed investment schemes are taxed' section of this PDS.

All fees are shown inclusive of GST and net of Reduced Input Tax Credits (where applicable).

Type of fee or cost	Amount
Fees when your money moves in or out of the managed investment product.	
Establishment fee The fee to open your investment.	Nil
Contribution fee The fee on each amount contributed to your investment.	Nil
Withdrawal fee The fee on each amount you take out of your investment.	Nil
Exit fee The fee to close your investment.	Nil
Management costs^{1,2}	
The fees and costs for managing your investment.	
Management fee³	0.35% pa of the Fund's net asset value.

¹ An allowance for transactional costs may apply to investments into and withdrawals from the Fund. Please see 'Transactional costs' in the 'Additional explanation of fees and costs' for further details.

² Rounded to two decimal places.

³ Wholesale clients (as defined in the *Corporations Act 2001 (Cth)*) may be able to negotiate this fee by contacting Client Services.

Example of annual fees and costs for the Fund

This table gives an example of how the fees and costs for this managed investment product can affect your investment over a 1 year period. You should use this table to compare this product with other managed investment products.

EXAMPLE: Antares Diversified Fixed Income Fund		Balance of \$50,000 with a contribution of \$5,000 during the year¹
Contribution fees	0%	For every additional \$5,000 you put in, you will be charged \$0.
PLUS Management costs	0.35%	And , for every \$50,000 you have in the Fund you will be charged \$175 each year.
EQUALS Cost of the Fund		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees from: \$175. What it costs you will depend on the fees you negotiate with the Fund, your IDPS operator or your financial adviser.

¹This example assumes the \$5,000 additional investment occurs at the end of the year and that value of the Fund does not change for the entire year. Actual fees and costs are based on the value of the Fund which fluctuates daily. This example isn't designed to illustrate any transactional costs that may apply to you, such as a buy/sell spread.

Additional explanation of fees and costs

Management costs

The management costs are fees and costs for investing the Fund's assets. The management costs includes the management fee and does not include buy/sell spreads or transactional costs.

The Responsible Entity receives a management fee for managing the assets of the Fund and overseeing the day to day operations of the Fund. The Responsible Entity will pay out of its management fee any fees paid to the investment manager, and other costs and expenses incurred in operating the Fund ('operational costs') such as custody costs, registry costs, auditing fees and tax return fees.

We may decide in the future to recover operational costs directly from the Fund in addition to the management fee.

Transactional costs

Transactional costs are the costs incurred when assets in the Fund or in underlying investments are bought or sold and includes costs such as brokerage, stamp duty and settlement costs. Transactional costs may also be incurred when the market process for purchasing assets causes the price paid to be higher than the value of the assets immediately after the purchase transaction, for example where bid/ask spreads are incurred.

The estimated transactional costs for the financial year to 30 June 2019 were approximately 0.07% of the Fund's net asset value which reduced the return of the Fund.

These costs are not included in the management costs and are an additional cost to you. No part of the transactional costs are paid to us or any investment managers.

Buy/sell spreads

You incur the buy/sell spread when you buy or sell units in the Fund.

Currently there is no buy/sell spread applied to the Fund.

Changes to fees and costs

We may vary fees or introduce new fees up to the maximums described in the Constitution, without your consent.

Under the Constitution for the Fund, we are entitled to charge the following maximum fees:

- **Management fee:** 3% pa of the value of the Assets determined at the end of the day (as defined under the Constitution).
- **Contribution fee:** 5% of the application amount (currently not charged).

If you invest directly in the Fund we will give you 30 days' notice of any increase in fees. No prior notice will be given in respect of changes to transactional costs or buy/sell spreads. For updated details go to mlcam.com.au

! You should read the important information about **Fees and costs** before making a decision. Go to the Product Guide available at mlcam.com.au/adff_pg
The material relating to **Fees and costs** may change between the time when you read this statement and the day when you acquire the product.

7. How managed investment schemes are taxed

Investing in a managed investment scheme is likely to have tax consequences. Because this PDS and the Product Guide are not tax guides and tax laws are complex and change from time to time, we strongly recommend that you obtain professional tax advice in relation to your own personal circumstances. This applies whether you are an Australian resident or a non-resident for tax purposes.

Australian taxation information

The general comments below only relate to the tax consequences arising to Australian residents. The Fund itself should not be liable for tax on its net earnings. Managed investment schemes do not pay tax on behalf of resident investors. Rather investors should include their proportion of the Fund's taxable income as income in their tax returns. Investors are assessed for tax on any income and capital gains generated by the Fund. Any net losses are retained by the Fund and potentially used to offset future matching gains.

The unit price of units issued before a distribution will include income accumulated in the Fund. The income that has been accumulating will generally be distributed. You may potentially have taxation liabilities on that income.

Depending on an investor's circumstances, a revenue or capital gain or loss may arise when units in the Fund are sold or redeemed.

! You should read the important information about **How managed investment schemes are taxed** before making a decision. Go to the Product Guide available at mlcam.com.au/adff_pg

The material relating to **How managed investment schemes are taxed** may change between the time when you read this statement and the day when you acquire the product.

8. How to apply

Investing directly

To invest directly, you must complete and sign the Initial Application Form for the Fund and post it to Registry Services with your application money via direct deposit or cheque and identification documentation as applicable.

The Initial Application Form is available at mlcam.com.au or on request from Client Services on 1300 738 355.

Investing via an IDPS

To invest in the Fund via an IDPS, you will need to contact your IDPS operator and complete the relevant IDPS application form and any other documentation required by the IDPS operator. You will also need to contact your IDPS operator in relation to making additional contributions to your investment.

You should contact your IDPS about any complaint you have. Your IDPS will work with us to assist you in resolving any complaints relating to your investment in the Fund.

The remaining information in this section only applies to direct investors in the Fund. If you invest via an IDPS, and require further information you should contact your IDPS operator.

Privacy

We collect and hold information necessary to provide you with the relevant services and information related to your investment. If you do not provide your personal information we may not be able to provide you with these services. We are subject to the NAB Group's Privacy Policy which is available by contacting Client Services or visiting our website at mlcam.com.au/privacy. We may disclose your personal information within the NAB Group and to others. More information about how we collect, use, share and handle your personal information is in our Privacy Policy, including how you may access or correct your information, the countries we may send your information to and how you may make a complaint about a privacy issue.

Cooling-off right

Unless you are a 'wholesale client' (as defined in the *Corporations Act 2001 (Cth)*), you have a 'cooling-off right' whereby you can change your mind about your initial investment in the Fund and ask for your money to be repaid.

The cooling-off right must be exercised by writing to the Responsible Entity. Your written request must be received by Registry Services within 14 days from the earlier of:

- when you receive confirmation of your investment, or
- the end of the fifth business day after the day on which your units were issued to you.

Your cooling-off right terminates immediately if you exercise a right or power under the terms of the Fund, such as withdrawing or transferring part of your investment.

Cooling-off rights do not apply to any additional contributions you make to your investment (including those made under any distribution reinvestment election).

Any repayment of your investment under the cooling-off right is subject to an adjustment for market movements (both positive and negative), taxes, buy/sell spreads, and fees and other costs referred to in section 6 of the PDS.

Anti-Money Laundering

We are required to comply with the *Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth)* and as such we may need to collect information from you or anyone acting on your behalf, and your related parties, to comply with our obligations.

Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standard (CRS)

We are required to collect information about your tax residency status, including whether you are a US citizen or resident for US tax purposes, and other relevant information to determine your reporting status under the FATCA and the CRS rules. If you identify yourself as a foreign resident for tax purposes, your account information may be reported to the relevant tax authorities.

Resolving complaints

Our Client Services team can usually resolve complaints over the phone. If we can't or you're not satisfied with the outcome, then you will need to write to us (address details are at the end of this PDS). We will work to resolve your complaint as soon as possible. If you are a retail client (as defined in the *Corporations Act 2001 (Cth)*) and you are not satisfied with the outcome of your complaint, you can refer the matter to the Australian Financial Complaints Authority on 1800 931 678. See afca.org.au for more information.

9. Other information

! You should read the important information about **Fax and email terms and conditions, Joint investors, Identity verification documents and Keeping you informed** before making a decision. Go to the Product Guide available at mlcam.com.au/adff_pg

The material relating to **Fax and email terms and conditions, Joint investors, Identity verification documents and Keeping you informed** may change between the time when you read this statement and the day when you acquire the product.
