

Fund Profile

Antares Listed Property Fund

October 2019

Fund description and investment return objective

The Fund is an actively managed portfolio that primarily invests in property securities that are listed (or expected to be listed) on the Australian share market. The Fund may also invest in listed Australian companies that operate in the property industry such as listed property development and funds management companies, as well as listed infrastructure companies, where the income and assets are property-related in nature.

The Fund's objective is to outperform the Benchmark (after fees) over rolling five-year periods.

Fund commentary

The Antares Listed Property Fund delivered a return of 0.7% (net of fees) for the month of October 2019.¹

The S&P/ASX 200 AREIT Total Return Index increased by 1.2% in October 2019, outperforming the S&P/ASX 200 Total Return Index by 1.6%.

All sectors posted gains led by the Diversified AREIT sector (+1.8%). Industrial AREITs returned (+1.6%), followed by Office (+0.9%) and Retail sector AREITs (+0.5%).

Overall, we continue to believe that the A-REITs remain in good shape. The key investment fundamentals remain sound – balance sheets are largely solid, distribution payout ratios haven't been pushed and capital management strategies are sound. In addition, corporate governance practices are healthy and growth strategies look sensible.

As for portfolio positioning, we currently hold a 16 stock portfolio, with a view that the sector is currently moderately expensive. This is a result of the sector's very strong recent performance in response to falling bond yields in Australia.

Our biggest active positions are in large cap stocks being overweight Scentre Group and GPT. Other core positions are overweight holdings in Mirvac, Viva Energy REIT and Abacus. The fund also has positions in non-index stocks - Sydney Airport, small-cap residential developer Peet, APN Convenience REIT and Vital Harvest.

Investor profile

This Fund is designed for investors who wish to benefit from the returns and diversification benefits provided by listed property and property related securities. Returns from listed property can comprise both distribution of income and capital growth, and are mainly derived from the Fund's investments in listed securities. The types of securities may include Listed Property Trusts, Real Estate Investment Trusts, property development and funds management companies, as well as infrastructure companies, where the income and assets are property related in nature. Investors should also be comfortable with potential fluctuations in capital values in the short to medium-term.
